

MC45 MAGNETIC CB ANTENNA - PL259 CONNECTOR

Discreet and efficient

The MC45 antenna is one of the smallest CB antenna (it has a length of 45 cm) and can be mounted on cars and vans. Its reduced dimensions make it nearly unnoticeable and can be easily confused with the radio antenna.

The whip in stainless steel is protected by a heat shrink sleeve. The connecting cable to the RG-174 radio has a length of 4.5 m. The magnetic force of the antenna is guaranteed up to a speed of 140km/h.

Magnetic Base

Thanks to the practical magnetic base it does not need any hole or complex installations. It can be installed and removed at your own convenience.

Aerodynamic design

The MC45 antenna has a special noise suppression design, allowing the air to flow around it, cancelling the noise produced by the wind.
